

AI JOB-SEARCH COPILOT

Get hired. Stop filling forms.

Job hunting is exhausting — the tabs, the forms, the silence. **Matatah** carries that weight for you. It scans **500+ company job boards**, AI-scores every role against your resume, writes a tailored resume and cover letter for each one, and auto-fills the entire application. **You just review and press Submit.**

scanned for real matches

Why job seekers love it

AI-Powered Matching

Every role is scored against your profile before you see it. Only real matches surface — not keyword noise.

Zero Form Fatigue

No more 45-minute application forms. The Chrome extension fills every field — even the custom questions.

Batch Apply

Pick your shortlist. Matatah opens each application, fills it, and waits for your review — it never submits without you.

Tailored Every Time

Generic applications get auto-rejected. Every submission gets a resume and cover letter rewritten for that exact role.

+ hundreds of custom company career portals built on these platforms.

“

I built Matatah and used it myself first. Forty applications in, I was already in active interview pipelines at AI companies in the US. The approach works — I built Matatah so you don't have to figure it out the hard way.
